Profile

Artificial Intelligence (AI) Engineering student at the National School of Artificial Intelligence and Digital (ENIAD) and holder of a University Diploma in Technology (DUT) in Business Intelligence and Data Science. I am actively seeking an end-of-year internship. Passionate about Data Science, Machine Learning, and application development, I am capable of designing end-to-end solutions, from data analysis to model deployment and web interfaces.

Education

Engineering Degree in Artificial Intelligence National School of Artificial Intelligence and Digital (ENIAD), Berkane.	2024 – Present
University Diploma in Technology (DUT) in Business Intelligence and Data Science Higher School of Technology (EST), Essaouira.	2022 – 2024

Professional Experience

Web Developer – End-of-Studies Internship <i>POGO, Fès</i>	April 2024 – May 2024
- Developed a web application for managing electric vehicle charging stations. - Designed interfaces, managed data, and integrated the backend using Django and PostgreSQL. - Implemented frontend functionalities using HTML, CSS, and JavaScript.	
Web Development – Observation Internship <i>Regional Office of Agricultural Development of Tadla, Fquih Ben Salah</i>	May 2023 – July 2023
- Observed and tracked the development of a web application dedicated to marketing agricultural products. - Familiarized with the web development environment using Django, Bootstrap, and SQLite.	

Academic Projects

Detection and Classification of Alzheimer’s Disease using Deep Learning, NLP, and RAG	2025 – 2026
- Designed a diagnostic support system combining brain MRIs, Deep Learning, and Natural Language Processing. - Developed a classification model using Python and PyTorch to identify disease stages from medical images. - Integrated a RAG approach with vector databases to leverage scientific sources and generate contextualized responses.	
Simulated Clinical Orientation Multi-Agent Workflow using LangGraph	2025 – 2026
- Developed a multi-agent workflow using LangGraph and LangChain to simulate a preliminary clinical orientation process. - Set up specialized agents for information gathering, synthesis, human validation, and final report generation. - Integrated the MCP protocol and exposed the system via FastAPI with a Streamlit interface to test the complete process.	
Automated Data Analysis Web Application	2024
- Designed a Django platform allowing users to import datasets for analysis. - Integrated an automatic Machine Learning algorithm selection system to optimize data processing.	

Technical Skills

Artificial Intelligence: Machine Learning, Deep Learning, Computer Vision, NLP, LLM, RAG, Data Analysis.
Agentic AI: LangChain, LangGraph, MCP.
Programming: Python, Java, C, C++, R, JavaScript, PHP.
Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy, Django, React.js, FastAPI.
Databases & Tools: SQL, MySQL, PostgreSQL, MongoDB, SQLite, Power BI, Git, GitHub, UML, MERISE.

Extracurricular Activities

HR Member – Nurl AI Student Club	2025
- Actively participated in member management and the organization of club events and activities. - Strengthened team spirit, internal communication, and a sense of responsibility within the organization.
